**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Species VIII, including claim 25, in the reply filed on May 31, 2005 is acknowledged.

However, upon further consideration, restriction to one of the following inventions is further required under 35 U.S.C. 121:

Group I. Claims 1-13, 18, 25, and 27-45, drawn to a combination, an implement for supporting foodstuff with a protruding portion, classified in class 269 including subclass 303.

Group II. Claims 46-60, drawn to a subcombination, an implement for supporting foodstuff, classified in class 269 including subclass 289R.

The inventions are distinct, each from the other because of the following reasons:

Invention of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claim 1. For example, claim 1 of Group I does not require main and auxiliary area peripheral edges having distinct geometrical configurations as required in claim 46 of Group II. The subcombination has separate utility such as it can obviously be used in

any implement for supporting foodstuff with a protruding portion and is not limited to the particular implement for supporting foodstuff of Group I.

***Conclusion***

A telephone call was made to the attorney of record, Louis Tessier, on July 1, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
